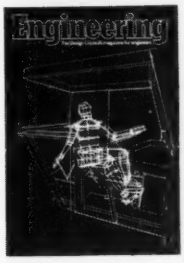
Engineering

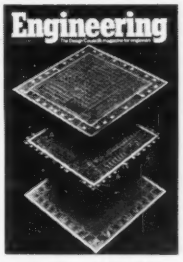
1980 Index

Index to Volume 220, numbers 1 to 12, January to December 1980. Compiled by H G T Harris, MBE, MIMechE



January 1-104

Viewpoint by Cameron MacSween
SAMMIE-A computer-aided ergonomics design system
Electricity distribution: I Substations
Roller screws
Medina Class life-boat
The Microjector - a small British fuel injector
Photoelastic stress analysis
Technical file No 73
Reinforced plastics bearings



February 105-240

Viewpoint by Peter Fairley
Evolution of the uncommitted logic array
Context of the controversy
Control versatility by modular design
Pneumatic circuit design: 1
Electricity distribution: 2 Overhead lines
10 ways not to treat chains and sprockets
Designing for improved value
Characteristics of rolling bearings: I Basic types and design parameters
Technical file No 74
Photofabrication

March 241-366

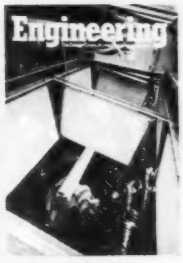
Viewpoint by GEP Constable
Three Mile Island and its implications
Quieter by design
Profile machining in the n.c. era
Digital techniques in broadcasting
Characteristics of rolling bearings: 2 Lubrication, installation and development
Electricity distribution: 3 Underground cables
Magnetic bubble memories
Technical file No 75
Hybrid circuits

April 367-506

Viewpoint by Dr Geoff Potter
Breaking into a new technology
1980 Design Council Awards
Fatigue and the design engineer 1
Designing for sheet metal
Designing for maintenance
Engineering plastics in materials handling
LH_2-a feasible aircraft fuel?
Mach 80
Technical file No 76
Carbon fibres I

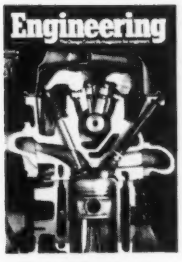
May 507-630

Viewpoint by Harry Cressman
Robot vision
1980 Design Council Awards
All our linkage mechanisms
Fatigue and the design engineer 2
Photoelastic stress analysis
Technical file No 77
Carbon fibres 2



June 631-746

Viewpoint by HRH The Prince of Wales
Turning on a new design
Advanced analysis techniques for the nuclear industry
Condition monitoring using thermographic techniques
Why System X excels
Fatigue and the design engineer 3
Design education in the schools
Technical file No 78
Noise control



July 747-840

Viewpoint by Doug Fears
CVH from Ford
The Wolfson Microelectronics Institute
Adding versatility to the forklift truck
Pneumatic circuit design 2
Maintenance considerations in valve selection
Design for assembly
Effective fastener selection
Technical file No 79
Self-lubricating bearings 1; Dry bearings

August 841-920

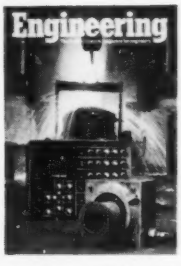
Viewpoint by Sir Peter Carey
A company of the future
Making inertia work
The no-oil engine
Input/output codes
Quality-an element of design
Choosing stainless steels
Technical file No 80
Self-lubricating bearings 2; Porous-metal bearings

September 921-1068

Newcastle & North-East engineering
Engineering development in the North-East
The Tyne and Wear Metro
Higher education and industry
Electric-vehicle controls
Energy transfer using heat pumps and heat pipes
Diversification in engineering
Good design and management spells success
Transmission of hydraulic power
SYALON materials
Technical file No 81
Dynamic seals

October 1069-1204

Viewpoint by Anthony Scott
Tornado - a firm defence commitment
Designing by computer
Circuit design with pneumatic logic
Unambiguous drawings by c.a.d.
Dynamic-seal failures
Engineering plastics
Design-office machinery need not be noisy
Technical File No 82
Zinc diecasting



November 1205-1320

DES 80-a problem-solving exhibition for design engineers
Making the most of materials
Pneumatics for power and control
Computers in the design office
Total energy utilisation
The importance of sound mechanical design
Finishes for protection and appearance
Cost-effective joining and assembly.
Exploiting microelectronics
Maintenance and reliability
Assessing casting quality
Developing the diesel
Variations in bearing fatigue life
Technical file No 83
Permanent magnets

December 1321-1400

Viewpoint by B J Hough
World energy - the dangerous years
Coal
Coal-fired ships
Coal-fired steam locomotives
Plastics assembly methods
Technical file No 84
Bonded - fluoropolymer coatings

THE DESIGN COUNCIL

Published by The Design Council, 28 Haymarket, London SW1Y 4SU

General Index

A

Actuators, linear, roller-screw, 34
Adhesive bond strength, 1254
Air Cushion Review, 641
Aircraft, *Tornado*, 554/VI; 1098
American National Standard for Information Interchange (ASCII), 877
Assembly, design for, 799
– plastics, 1356
Automobile research, 860
Awards and prizes
Design Council, 1980, 402; 540
HRH the Duke of Edinburgh's Designer's Prize, 1980, 637

B

Bacteria-culture apparatus, 407
Barlow, Sir William, 925
Barnard, Mark, 862
Beacon, radio, distress, 540
Bearings
epoxy-composite, 1131
fatigue life, variations, 1272
gas-lubricated, thrust, 313
hydrostatic shoe, 1213
porous-metal, 888/I
reinforced-plastics, 40/I
rolling, characteristics of, 186; 296
self-lubricating, 786/I; 888/I
solvent cleaning of, 312
Blair, Prof. Gordon P, 251
Blood sampler, 406
BHRA Fluid Engineering, 1000/I; 1119
– *Seal User's Handbook*, 1121
British Railways Board, 420
British Steel Corp, Scunthorpe Division, 669
Broadcasting, digital techniques in, 291

C

C.A.D./C.A.M. *see also* Computers
aids, 859
capabilities, 1323
ergonomics system, 21 (letter), 1077
CAM-X system, 1104
for die design, 933; 1140/III
for linkage mechanisms, 547
teaching of, 1188
three-dimensional, 1104
unambiguous drawings by, 1116
Cable conduit, improved, 402
Cable-avoiding tool, 540
Cadmium, control of, 1131
Caldecote, Lord, 925
Cam laws (letter), 254
Carbon fibres
dangers of, 312
properties and usage, 430/I; 544/I
composites, stress relief of, 445
Carey, Sir Peter, 1077
Cars
corrosion (letter), 7
world land-speed record 109
technology and production techniques, 860
wheel aligner, 404
Castings,
quality assessment, 1247
Thixocasting method, 445
Chains and sprockets, care and maintenance, 173
Channel Tunnel, 843
Circuits, hybrid, 302/I
Coal, 1344
Coal-fired locomotives, 1348
Coal-fired ships, 1344
Coal-based liquid fuel, 843
Coal conveyor, pneumatic, 1345
Coatings,
bonded-fluoro-polymer, 1368/I
sputtered and ion-plated 807
Codes, input/output, 875
Communications
digital broadcasting, 291
telephone, digital, 686
underwater, laser, 445
Composite materials,
c.f.r.p., 430/I; 554/I
improved, 563
Compressor, air, mobile, 282
Computers *see also* C.A.D./ C.A.M.
input/output codes, 875
program for design of dies, 933; 1140/III
Controls, electric-vehicle, 976
Condition monitoring
thermographic, 669
engine, 444
Corrosion
air/fuel ratio, 168
Charing Cross bridge, 375
desalination plant, 1131
detection, radiographic, 807
hot, 1017

from waste oil, 807
geothermal, 925
thermal storage, 886
total utilisation, 1237
transfer, 978
World, 1339
– Coal Study (WOCOL), 1344
Engineering, history of, 995
Engineers, statutory registration of, 3; 139
Engines
condition monitoring of, 444
diesel, developing, 1268
–, fuel injector, small, 47
future designs, 862
low-maintenance contained-oil, 872; 929
petrol, CVH, 770
Stirling, for cars, 1254
Ergonomics, c.a.d., 21
Etching, photochemical, 160/I

F

Failure prediction, Si_3N_4, 1017
Fans, tunnel-ventilation, 984
Fasteners, selection of, 805
Fatigue
avoiding fretting failures, 444
–, creep interaction and, 1017
–, designing to avoid, 410; 566; 690
–, in bearings, 1272
Finniston Committee, 139
Flow visualisation, 169
Fuels, biomass, 886

G

Gauges, *see* Measurement
Generators wind-power, 1071
Gear life, extending, 1362
Gears, dynamics and lubrication, 1362

H

Heat pipes and pumps, 978
Heat pumps, solar, 312
Hose, hydraulic, 990
Hovercraft (letter), 641
Hybrid circuits 302/I
Hydraulic fluid, dangers of, 1362
Hydraulic-power transmission, 990
Hydrogen, liquid, as fuel, 448; 1258

I

Industrial design (letter), 254
Inclinometer, digital, 1254
Inertial navigation, 866
Injector, diesel, small, 46

K

King, Spen, 860
Kinnersly, Richard, 872

L

Lathe, automatic, multispindle, 659
Lifeboat, rigid inflatable, 44
Logic, pneumatic, 1111
Lubricants, selection of, 1017

M

Machining, profile, n.c., 328
Magnetic levitation, 1018
Magnets, permanent, 1260/I
Maintenance
design for, 794
engine for low, 872
Management
communications, 129
Management, industrial, 988
Manufacture, automotive, 864
Mastitis detector, 543
Materials
composite, 430/I-554/I
high-temperature, 55
improved composite, 563
SiAlON ceramic, 1009
stainless steel-selection, 883
Materials handling, plastics in, 440
Measurement
gauge, thickness, underwater, ultrasonic, 542
stress analysis, photoelastic, 50; 572
torque, precision, 55
Mechanical handling, f.l.t., 779

N

North East England, engineering in, 952
Newcastle upon Tyne, University of, 967
Noise reduction
air-compressor design for, 282
design for, 678/I
in fans and pumps, 169
office machinery, 1149
in tunnel-ventilation fans, 984
roadbreaker, design for, 397
rubber system for, 168
Nuclear energy
analysis techniques, 664
Three Mile Island incident, 273
Numerical control
profile machining by, 284
tool-size checking, 107

O

Oil boom, air-jet, 1253
Oil exploration, tools for, 545
Oil dispersal, 445
Oil re-use manual, 1131

P

Photofabrication, 160/I
Piping terminations, 1362
Plastics
acetyl co-polymer, 440
assembly of, 1356
bonded-fluoropolymer coatings, 1368/I
carbon-fibre reinforced, 430/I; 554/I
engineering, 1127
in materials handling, 440
metals replacement by, 397
moulding economies, 561
processing effects, 886
reinforced, for bearings, 40/I
Plating, ion, 807
Porous-metal bearings, 888/I
Power transmission, chain, 173
– hydraulic, 990
Pneumatics, 1235
– circuit design, 146; 782; 1111
– roadbreaker design, 397
– compressor, low-noise, 282
Pumps and motors, hydraulic, 142

R

Radiography, corrosion detection by, 807
Radio communications, satellite, man-portable, 544
Railways
design for maintenance, 420
Tyne and Wear Metro, 960
steam locomotives, proposed, 1348
waggon retarder, hydraulic, 545
Resuscitator, instant action, 406
Retarder, hydraulic, 545

Roadbreaker, quiet pneumatic, design of, 397
Robots, vision systems for, 533

S
Safety
analysis, nuclear-power industry, 665
cadmium control, 1131
carbon-fibre dangers, 312
hydraulic fluids, 1362
roadbreaker design for, 397
vibration injury, 561
Seals, dynamic, 1000/I
– failures, 1119
Sheetmetal working, design for, 416
Sheron, Harry, 860
Ships and shipbuilding
coal firing, 1344
lifeboat, 44
Silicon-nitride failure, 1017
Simpson, Charles, *Obituary*, 251
Solid-state devices
design, 776
hybrid circuits, 302/I
magnetic-bubble memories, 316
uncommitted logic arrays, (u.l.a.s.), 130
Steam locomotives, proposed improvements, 1348
Steel, stainless, selection, 882
Stirling engine, 1254
Stress analysis, photo-elastic, 50; 572
Stress-corrosion cracking 882
Stress relief, c.f.r.p., 445
Stretcher transit isolator, 407

T
Telephone exchange, System X, 686
Television
closed-circuit, inspection, 540
digital techniques in, 291
Testing
electric-motor, 1253
accelerated life, 886
Thermography, industrial applications of, 669
Toxicity, 445
Transmissions, vehicle, 863
Transport, maglev, 1018
Tribology *see also* Bearings *and* Lubrication
Trucks *see* Vehicles
Tubing hangar and running tool, hydraulic, 545

V
Valves, maintenance considerations, 794
– spool, power logic range 544
Value, designing for improved, 178
Vehicles *see also* Cars
cab system, Leyland C40, 403
electric controls 976
– four-wheeled, 405
mirror, rear-view, heated, 404
research, 860
semi trailer, refrigerated 403
trucks, dump, off-road, articulated, 542; 988
– fork-lift, attachments for, 779
– fork-lift, 25-tonnes, 541
Ventilation, fan design for, 984
Vibration injuries, 561

W
Walker, P B, 691
Warwick University, automotive research, 863
Wave power,
Lanchester project 515
Nippon-Kokan dolphin system, 375
Welding
arc, automated, 313
fillet, waste in, 1254
Wind-power generator, 1071
Wolfson Microelectronics Institute, 776
World Coal Study, 1344
World land-speed record, 109

Y
Yarns, polyester, production machine, 541

Z
Zinc, diecasting, 1140/I

Feature Index

A
Adding versatility to fork-lift trucks, 779
Advanced analysis techniques for the nuclear industry, 664
All our linkage mechanisms, 547
Assessing casting quality, 1247

B
Bonded-fluoropolymer coating, Technical file No 84, 1368/I
Breaking into a new technology, 397

C
Carbon fibres 1: Properties and manufacture, Technical file No 76, 430/I
Carbon fibres 2: Use in composite materials, Technical file No 77, 554/I
Characteristics of rolling bearings
1: Basic types and design parameters, 186
2: Lubrication, installation and developments, 296
Choosing stainless steels, 882
Circuit design with pneumatic logic, 1111
Company of the future, A, 860
Condition monitoring using thermographic techniques, 669
Context of the controversy, 139
Control versatility by modular design, 142
CVH from Ford, 770

D
DES 80 – a problem-solving exhibition for design engineers, 1233
– Computers in the design office, 1236
– Cost-effective joining and assembly, 1240
– Exploiting microelectronics, 1241
– Finishes for protection and appearance, 1239
– Importance of sound mechanical design, 1238
– Maintenance and reliability, 1243
– Making the most of materials, 1234
– Pneumatics for power and control, 1235
– Total energy utilisation, 1237
– Versatile hydraulics, 1242
Design education in the schools, 699
Design for automatic assembly, 799
Design for maintenance, 420
Design for sheet-metal working, 416
Design-office machinery need not be noisy, 1149
Designing by computer, 1104
Designing for improved value, 178
Developing the diesel, 1268
Digital techniques in broadcasting, 291
Diversification in energy, 984
Dynamic-seal failures, 1119
Dynamic seals, Technical file No 81, 1000/I

E
Effective fastener selection, 805
Electric-vehicle controls, 976
Electricity distribution
1: Substations, 28
2: Overhead lines, 150
3: Underground cables, 307
Energy transfer using heat pumps and heat pipes, 978
Engineering developments in the North East, 955
Engineering plastics – some recent developments, 1127
Engineering plastics in materials handling, 440
Evolution of the uncommitted logic array, 130

F
Fatigue and the design engineer, 410, 566, 690

G
Good design and management spells success, 988
Good future for coal, 1344

H
Higher education and industry, 967
Hybrid circuits, Technical file No 75, 302/I

I
Input/output codes, 875

L
LH_2 – a feasible aircraft fuel?, 448

M
Magnetic-bubble memories, 316
Maintenance considerations in valve selection, 794
Making inertia work, 866
Medina-class lifeboat, 44
Microjector, The – a small British fuel injector, 47

N
Newcastle and North-East engineering (Group title), 952
No-oil engine, The, 872
Noise control, Technical file No 78, 678/I

P
Permanent magnets, Technical file No 83, 1260/I
Photoelastic stress analysis, (coating technique) 50; (letter) 377
Photoelastic stress analysis (model technique), 572
Photofabrication, Technical file No 74, 160/I
Plastics assembly, 1356
Pneumatic-circuit design: 1, 146; 2, 782
Profile machining in the n.c. era, 284

Q
Quality – an element of design, 880
Quieter by design, 282

R
Redecking Charing Cross Bridge, 377
Reinforced-plastics bearings, Technical file No 73, 40/I
Robot vision, 533
Roller screws, 34

S
Sammie: a computer-aided ergonomics-design system, 21
Self-lubricating bearings
1: Dry bearings, Technical file No 79, 786/I
2: Porous-metal bearings, Technical file No 80, 888/I
Syalon materials, 1009

T
Teaching c.a.d., 1188
TechAlert, 55; 168; 312; 444; 561; 696; 807; 1017; 1131; 1253; 1362
10 ways not to treat chains and sprockets, 173
Three Mile Island and its implications, 273
Tornado – a firm defence commitment, 1098
Transmission of hydraulic power, 990
Turning on a new design, 659
Tyne and Wear Metro, The, 960

U
Unambiguous drawings by c.a.d., 1116

V
Variations in bearing fatigue life, 1272
Viewpoint, 19; 129; 269; 393; 529; 655; 769; 859; 1095; 1337

W
Why System X excels, 686
Wolfson Microelectronics Institute, 776
World energy – the dangerous years, 1339

Z
Zinc diecasting, Technical file No 82, 1140/I
